

Inverse

The image shows a Cartesian coordinate system with a white background. A solid black horizontal line and a solid black vertical line intersect at the origin, dividing the plane into four quadrants. Dashed black lines also intersect at the origin, representing the asymptotes of the function y = 1/x. The curve of the function is plotted in the first and third quadrants, approaching the x-axis and y-axis as asymptotes. The word 'Inverse' is written in a large, black, sans-serif font in the upper-left quadrant.
